

REMARKS

Entry of this amendment prior to examination is respectfully requested.

By the present amendment, the specification has been amended to provide the continuing data required by 37 CFR § 1.72. In addition, the minor amendments made to the specification which were made by the October 14, 2003 Amendment in the parent application have been made in the present application as well.

It is noted that the present Continuation application submits new claims 1-20 for examination. It is respectfully submitted that these new claims define features of the invention neither taught nor suggested by the cited prior art in the parent application. For example, independent claim 1 defines an arrangement with first, second and third inverter circuits operating in conjunction with a scanning line, a video signal line, a transistor, a pixel electrode and a pair of AC power supply lines which is not at all suggested in the cited prior art. Independent claims 8 and 14 also define particular arrangements involving scanning lines, video signal lines, transistors, memory circuits, pixel electrodes and a pair of AC power supply lines, again setting forth combinations of elements, interrelated in the defined manner, to clearly define over the cited prior art from the parent case. Accordingly, allowance of these independent claims 1, 8 and 14 and their dependent claims over the cited prior art is respectfully requested.

In view of the foregoing, entry of the present amendments and examination of the above-identified application on the merits in due course, are respectfully requested.

Kindly charge any additional fees due, or credit overpayment of fees, to the deposit account of Antonelli, Terry, Stout & Kraus, LLP Deposit Account No. 01-2135 (Docket No. 501.40202CX1).

Respectfully submitted,

ANTONELLI, TERRY, STOUT & KRAUS, LLP
